

*Industrial machine service with a performance promise*

## INDUSTRIAL MACHINERY SERVICE

### ***Make El-Hy-Mec your productivity partner***

From installation to maintenance, repair, rebuild and retrofit, El-Hy-Mec is your single source for expert industrial machine service and support. We take our job very seriously. We do what we say we'll do, on schedule, wherever we're needed. "Downtime" is not in our vocabulary; "productivity" is. That's why more and more manufacturers call on us to help them get maximum performance from their most costly assets.

### ***From turnkey maintenance... to shop floor assistance... to equipment relocation***

Some of our customers consider us their maintenance department. Others recommend us for their customers' warranty work or call us when they need extra hands on the shop floor. Still others rely on us to make their moves trouble free – whether they're in-plant or to a new location. We'll unwire, dismantle, move, reassemble, anchor and level equipment to ensure it runs right. Name a machine or a brand from the 1940s through today, and we've probably worked on it – installed it, sourced problems, ordered parts, performed maintenance and repair and warranty work.

### ***Your industry, your machines***

Here are some examples of categories and brands we service:

“We've had the pleasure of working with El-Hy-Mec since October of 1982. This excellent 23-year relationship has helped us service our customers in many capacities. In our fast-paced manufacturing world, El-Hy-Mec brings invaluable technical knowledge of machinery and the flexibility to address our customer's emergency needs – to disassemble machinery; to move, reassemble and to repair it. For these reasons and more, we use the services El-Hy-Mec provides, and always tell our customers to call on them for maintenance assistance.”
